

Date: March 16, 2011

Name of PPI Partner: Response Computer Group

To Whom It May Concern:

We have been engaged by Response Computer Group to validate full compliance of RCG OSAS CC v 11.0 against the Payment Application Data Security Standard v1.2

Obtaining PA-DSS v1.2 compliance validation ensures that RCG OSAS CC v 11.0 handles your customer's payment card account data in a safe and secure manner and that all documentation is in place to implement this validated payment application in a PCI compliant manner.

RCG OSAS CC v 11.0 has completed forensic lab testing as of March 1, 2010 and a draft Report on Validation (ROV) has been submitted to the Payment Card Industry Security Standards Council (PCI SSC) for final quality review and acceptance. Only payment applications that we deem are fully compliant with the standard are submitted to the PCI SSC for final processing.

Pending final quality review and acceptance by the RCG OSAS CC v 11.0 will be listed as a fully validated payment application at [www.pcisecuritystandards.org](http://www.pcisecuritystandards.org)

If you have any questions regarding the PA-DSS validation of RCG OSAS CC v 11.0 please feel free to contact me at any time.

Respectfully,

A handwritten signature in black ink that reads 'Kenneth P. Rowe'. The signature is written in a cursive style.
